

Suggested layout for Boer Goat handling facility

LEGEND

- Water supply points
- Gate posts
- Work table
- ⌋ Gate
- ▨ Loading ramp

NOTES

1. Kidding pens should be $\pm 1,5\text{m} \times 1,5\text{m}$.
2. Kidding and treatment pens should all have water and feed troughs.
3. Treatment pens can be $1,8\text{m} \times 1,8\text{m}$.
4. Crush should be $\pm 400\text{mm}$ wide.
5. Height of walls and sides can be either 900mm or 1100mm .
6. Gates should fit flush on sides and bottom to prevent crawling.
7. Floors, excepting crush, should ideally be earth not concrete.
8. Height of loading ramp should be adjustable.
